ABOVE: *Prairie style furniture fills a sunny sttting area of this lake home.*

ABOVE: *This study features new bookcases designed to look like those of the Prairie era, complete with art glass doors that relate to the motif on the windows in the residence. The easy chairs, ottoman, clock, and lamp all coordinate with the cabinetry, thereby fulfilling the Prairie School demand for a cohesively furnished environment.*

ABOVE: *Carrying out the notion of a unified milieu, the dining room in the same house features a pair of cabinets that match the ones in the study. Prairie styling is evident in the solid, cuffed legs of the table and the tall, spindled backs of the chairs.*
